Welcome to Farmson Pharmaceutical Gujarat Pvt. Ltd.

armson was established in the year 1971 for manufacturing of Paracetamol through phenol route. In the year 2000, we switched over to the PNCB route to manufacture Paracetamol. Currently, we are the GLOBAL LEADER in API Paracetamol production. With the motto of self-reliance, in 2005, we set up a plant in Jhagadia-Bharuch with backward integration for manufacturing of PAP from PNCB wherein we were the first and only company producing PAP through Hydrogenation process. For manufacturing API Paracetamol, we commissioned Unit-II in 2012, while in 2018, Unit-I was renovated and restructured to further expand our capacity.
