Welcome to Macsen Laboratories

Macsen Laboratories was started as a household unit on the rooftop of the dwelling house in the old quarters of historic walled city of Udaipur, by Dr. Mohanlal Agrawal, Mr.Puranmal Agrawal & Mr. Chandra Sen Agrawal (Sons of Dr. Mohanlal Agrawal), in 1952. The name Macsen is composed from “M A” which is short form of “Mohanlal Agrawal” and “C SEN” which is short form of “Chandra Sen”. One of the very first product of Macsen Laboratories, “Mercurochrome” is still manufactured by us. Macsen grew in leaps and bounds under the leadership of Mr. N.K Agrawal (son of Mr. Puranmal Agrawal), who was a gold medalist pharmacist from Nagpur University. Because of his passion for chemistry, Macsen soon made a portfolio of Niche API products and became the market leader in those products. In August 2008, Mr. N.K Agrawal left this world for a better place, leaving the responsibility of continuing the legacy upon his next generation.
