Welcome to Galaxy Laboratories Private Limited

Galaxy Laboratories Private Limited is a cell born in the year 1995 and therefore is a client of the famous long zoo for excellence in chemical and pharmaceutical innovation. The foundation of established tradition and opened avenues of innovation joined by rich experience in embracing such concepts was held in furfurylamine (CAS # 617-89-0) and 2,4 dichloro-acetophenone (CAS # 223416-4). Over the years, Galaxy Laboratories has risen to become a trusted manufacturer of intermediates for Active Pharmaceutical Ingredients (APIs) and Specialty Agro Chemicals. With two decades of experience, the company has perfected many of the traditional and modern technologies to produce high-purity, high-yield products. The indomitable determination of the company towards quality, innovation, and sustainability has formed its robust capability and position in the leader organizations in the industry. Galaxy Laboratories is determined to realize the ever-changing demands of its precious clients, availing its state-of-the-art manufacturing facilities and highly skilled workforce. This all-encompassing focus on research and development makes it possible for a compounding process and products to be upgrade continuously to address the demands of the global marketplace. By following rigid quality standards and developing an environment of excellence, Galaxy Laboratories has won the trust of its customers globally.
