Welcome to RanQ Remedies Pvt. Ltd.

For more than two decades since its inception in 1993, RanQ has been a leading pharma excipients manufacturer in India. RanQ Pharmaceuticals and Excipients Pvt Ltd, the parent company, was promoted by late Mr. G M Ranadive, who was the Ex-Director Burroughs Welcome India. The parent company floated RanQ Remedies Pvt Ltd in 2004, under which the present manufacturing and commercial operations are being carried out. Since then, RanQ has been a leading excipients manufacturing company in India, which has enabled us to complement our extensive customer support with high-quality services. As a pharmaceutical excipients supplier, we produce high-quality cellulose-based excipients that predominantly cater to the pharmaceutical and food industries. Our two state-of-the-art manufacturing sites are located in Maharashtra, India. Several regulatory certifications approve our facilities, and our products comply with IGMP, EDQM, and USFDA standards. As one of the leading excipients manufacturing companies in India, we deliver pharmaceutical excipients and other products worldwide via a reliable and extensive distribution network.
