Welcome To Adley Formulations

Adley Bulk Drugs and Research is a newly constructed facility specialize in Oncology API manufacturing and research in the northern region of India with modern highly sophisticated machineries and infrastructure as per latest USFDA & EU_GMP norms. Strong R&D and quality departments are jointly developing latest generation Oncology API's in a phase wise manner as per international market requirement. Now we have independently become successful in developing different NDDS technologies. These new growth areas will add significant depth to the existing product pipeline. The Adley group is very much positive to increase the revenue generation, economies of scale and profitability of the while group. We are committed to oncology development through new creation, catering the

benefit to the society and serving the medical fraternities
& business associates
