Welcome to AG Industries

AG Industries started with manufacturing mint products in 1990. With an understanding of the industry and tasting success in a small span of time, Mr. Anil Gupta started a new brand by the name of AG INDUSTRIES in 1994 that grew with time to become a popular name among-st Essential Oils, Cold-Pressed Carrier oils, and allied product manufacturers and suppliers. AG Industries is the leading manufacturers and B2B supplier of therapeutic-grade 100% organic essential oils, carrier oils, and allied products to some of the leading brands around the globe.Since their inception, they have focused on producing high-quality organic products through well-recognized practices like steam distillation for essential oils and cold pressing for carrier oils. After an initial rise by Mr. Anil Gupta, his elder son Mr. Arpit Gupta introduced a visionary mindset supported by a technical background giving birth to an organized system.
