Welcome to Applied Genomics Pvt. Ltd.

Applied Genomics Pvt. Ltd is an Indian Biotech services company with expertise in the application of genomics to address various biological problems. As a Biotechnology startup we wish to work with industries to develop solutions for improving their production capabilities through application of genomics. We can understand the needs of Seed Industries, Food industries, Veterinary and animal Sciences and Clinical Diagnostics and we partner with them to develop innovative products and technologies by application of genomics. We specialise in the application of Next Gen Sequencing technologies, Real Time PCR, High Throughput Genotyping, Genome Editing and Bio-informatics for our R and D needs.
