Welcome to Avizen Biopharma Pvt. Ltd.

The plant is manufacturing a wide range of products in General Capsules, Cream, Gel, Lotion , Ointment forms. This state-of-the-art facility is adherent to WHO GMP and is equipped with the latest machinery infusing modern testing equipment to bring out the best quality products, and accurate results with faster and increased production capacities. As quality assurance measures, procedures are adopted to minimize human touch to the products which in turn prevents contamination. The production of all formulations is carried out as per WHO GMP norms under controlled environmental conditions of light , RH, wherever necessary, under Class 100,000 through HEPA filters. The In-Process Quality Control , Assurance (IPQC & A) plays an important role in the manufacturing process as it continuously monitors all production processes at every stage for the accuracy to be brought out in the products. Frequent quality parameter checks are conducted to ensure a defect-free , perfect product. Modern testing equipment is the heart of our manufacturing facilities and plays a vital role in regulating the quality of products. We have an in-house fully equipped laboratory to carry out analysis of APIs, Excipients, Packing materials , Finished Products by physical, microbiological, instrumental , chemical testing and effective process control. Accelerated , Real Time Stability Studies are undertaken at our plant for different climatic zones as per the ICH , WHO guidelines.
