Welcome to Brawn Laboratories Ltd.

In the peculiar twist of fate, India boasts the title of “The world’s third-largest producer of generic drugs. But on the dark end, it struggles to adequately cater to the needs of ordinary people of its populace. Within this paradox, the triad of access, quality, and affordability becomes a formidable hurdle. It is disconcerting to see that access to quality medicines and anti-cancer drugs is just like an uphill battle for the common man of this era. I embarked on a journey to make quality medicines and anti-cancer drugs affordable to ordinary people. This journey is fraught with lots of difficulties and obstacles, but for us “Nothing Is Impossible”. With this spirit, today BRAWN is continuing its legacy to provide top-class healthcare services to common people at affordable prices. Today, BRAWN is hailed as one of the fastest-growing pharmaceutical companies in India. We are powered by highly advanced manufacturing facilities and technologies. We are a team of seasoned healthcare professionals who function as a family, united in our mission and vision.
