Welcome To Ceuticoz Progressive Dermatology

Ceuticoz is a dermatologist-driven dermo-cosmetic skincare brand built on a strong legacy of clinical dermatology and prescription science. The entire range is formulated in Canada and manufactured at a WHO-GMP certified plant in Baddi, Himachal Pradesh. With over two decades of experience in developing evidence-based skin and hair care solutions, Ceuticoz has established itself as a trusted partner to dermatologists and trichologists, with prescriptions written and repeated by more than 15,000 specialists across markets.

The brand's foundation lies in a prescription-first philosophy, where formulations are designed not for short-term cosmetic appeal, but for long-term clinical outcomes, high tolerability, and consistent patient compliance.

Ceuticoz offers a wide and strategically structured portfolio covering key dermatological concerns such as acne, hyperpigmentation, sensitive and barrier-compromised skin, anti-ageing, advanced sunscreens, hair and scalp disorders. Each product is developed using internationally acclaimed ingredients at clinically relevant concentrations, ensuring results that align with real-world dermatology practice. This breadth of formulations enables doctors to rely on Ceuticoz across multiple indications, driving strong brand recall and repeat prescriptions rather than one-time usage.

With a presence in over 20 countries, Ceuticoz brings global credibility backed by robust

manufacturing, quality control, and research capabilities. Its international footprint reinforces confidence among dermatologists and business partners alike, positioning the brand as reliable, scalable, and future-ready.

Ceuticoz offers a dermatologist-driven franchise opportunity built on repeat prescriptions, ensuring consistent and sustainable business growth. The portfolio is designed for everyday dermatology, driving long-term secondary sales. New product launches every year keep the range clinically relevant and aligned with evolving skin and hair concerns.

Franchise partners receive extensive training and scientific support, along with access to a dedicated digital detailing app for effective doctor engagement. With globally benchmarked formulations at competitive prices, Ceuticoz delivers strong prescription acceptance and high partner margins. Ideal for partners seeking a stable, scalable, and credibility-led dermatology business.
