### Welcome to East West Pharma

East West Pharma is an organization rooted to the conviction that improvement and innovation in healthcare happen when a company tuned to emerging ailment patterns teams up with a passionate community committed to delivering solutions that leverage the latest in medical science.

### Vision

To be present across the entire healthcare delivery vertical through offering patients as well as clinicians a wide choice of therapeutic options that leverage the latest in medical science.

### Mission

It is our mission to offer leading edge solutions to emerging healthcare problems. Through a constantly evolving product

portfolio we will address specific needs of every clinical segment. The operating philosophy will balance a well-defined business focus with the willingness, and the will, to undertake major and rapid change when necessary so that we remain current in all the segments and markets that we operate. It is our mission to track and exploit the swift twists in market boundaries as they are redefined by new technological, market and competitive boundaries. We will be present in the entire healthcare spectrum from maintenance of wellness to treatment of illness. The path to our vision will look at growth that is both organic and acquisitive. Our operating philosophy will be guided by the premise that the best way to manage the future is to invent it.
