Welcome to Elysium Pharmaceuticals Ltd.

It all began in 1996. The setting of our itinerary, the journey, the milestones, fellow travelers, and everything else along the way. Established then as a formulations unit, Elysium commenced its journey a good two years later, in 1998, crossing many important milestones along the way. The most important being our success in establishing ourselves as the most preferred contract manufacturer for the most reputed multinationals and some of India's leading brands of pharmaceutical products.
