Welcome to Harson Laboratories

Our organization established in 1970 is headed by an expert team which envisaged marketing strategy by experienced This pursuit manifests itself in our commitment to achieve Quality Excellence.business vision. Ours is a story of determined pursuit of perfection by our team which keeps pace with the fast changing trend of world market. A reflection of the extent of Harson's expertise is the wide range of products which are presently being marketed in domestic as well as internationally with great success. Product Innovation is the keystone to a company's progress and Harson is particularly well placed to take advantage of new product opportunities. The company's expert knowledge of raw materials and their behavior is first brought to bear on new formulations, then extensive testing is carried out to insure that product specifications can meet rigorous demands of regulatory authorities. We have very sophisticated plant and machineries to manufacture high quality products. We are following up stringent quality control and Good Manufacturing Practices as per World Health Organization standards. We have also our own empty ampoule manufacturing plant. Our products has been exported to many countries such as Bolivia, Cambodia, Honduras, Iran, Kenya, Laos, Myanmar, Nicaragua, Nigeria, Papua New Guinea, Philippines, Sri Lanka, Thailand, Vietnam, etc.
