Welcome To Just Herbs

Just Herbs is a line of pure, bespoke, and Ayurvedic results-driven skincare made from certified organic and wild crafted ingredients collected from across India. The brand stands for honesty (follows full ingredients disclosure) and purity (uses authentic Ayurvedic herbs without harmful commonplace cosmetic chemicals). Most people think that natural products are not as effective as chemically formulated ones. Although there is growing awareness that the latter could prove harmful for our skin and general health; most of us think that using chemically laden skincare is a price we must pay to get results and look beautiful. Just Herbs seeks to change this notion. We believe, choosing between a product that's good for your skin and one which is safe for your health and for the earth is a choice you should never have to make. The vision behind Just Herbs was to create a brand that stands not just for luxury alone; but one that delivers a pure and pleasant experience which is safe for the skin, the environment, and at the same time driven by the commitment to bring about results for common skin concerns. This is expressed in each of our formulations and in our tagline: 'Luxurious and Safe Ayurvedic skincare that works! We have our roots in Ayurveda the ancient Indian plant based healing system- and follow the Ayurvedic Bhaishajyas (texts) in all our formulations. We didn't need a fancy name. Just Herbs™ signifies what we stand for- simplicity and purity. All we use to create these formulations is ancient Indian wisdom and the purest of herbs and plant extracts.
