Welcome to M B Sugar & Phamaceuticals Pvt. Ltd.

A sweet smiling company initiated by 3 brothers Vijaykumar, Dineshkumar & Anilkumar Lodha in 1991 with determination of shifting to manufacturing from trading company which was found under their father's guidance late Shri Bhagchandji Lodha. They started with manufacturing of Lump Sugar (Mishri), being committed on quality along with divergent thinking MB became largest producer in India. To diversify and grow business, we ushered into the untapped sector of pharma, where opportunities were identified in pharma grade sugar excipients in pharma products. Initiated in 1997, we have since then manufactured high-quality pharma grade sugar that facilitated resolutions to issues related to sugar and played a vital role by introducing the concept of various particle sizes of sucrose, which substantially increased yield.
