welcome to Madras Pharma group

Started in the year 1979, The Madras Pharma group is a contract manufacturing organization, having 8 manufacturing facilities, 3000 employees, covering all dosage forms and selling products in India and across the world. The Madras Pharmaceuticals is one of the most respected contract research and manufacturing (CRAMS) organization in India. We are a B2B business that out licenses the generic products that are developed by our in-house R&D to the pharmaceutical marketing companies against a supply agreement. We do not own any brands in India and we are a pure play CRAMS partner thereby not competing with our customers in the market.
