Welcome to Maharshi Badri

> Maharshi Badri pharmaceuticals group had a humble beginning over 50 years ago. Maharshi Badri pharmaceuticals founder Ayurvedacharya Vaidya Badri Prasad Ji started producing some highly effective herbal products. Those medicines were a synthesis of his years of research and study of ancient Indian traditional texts of Ayurveda blended with his experience in practising this system based on the harmonious relationship between nature and humans. We feel proud that the seed our founder of Maharshi Badri Ayurvedic & Herbal Products Manufacturer had sown in small premises in the city of Jaipur (the famous Pink City) in India has now grown into a huge tree in the form of Maharshi Badri Group. The group consists

of multiple entities manufacturing classical Ayurvedic medicines and patented Ayurvedic formulations based on systematic research under experienced practitioners. The group has established itself as a synonym of Quality and Efficacy under the able leadership of our current CMD Mr Sanjay Jalandhra – son of our founder and himself a scholar of Ayurveda. Since taking charge of the group in 1997, his mission has always been to combine the knowledge of our forefathers with most modern technology, be it in manufacturing, distributing or dispensing. He is a visionary with a global mindset and firm traditional roots.
