## Welcome to Noreva Biotech

Established in 2010, Noreva Biotech has achieved great height in a short period of time. With the experience of over a decade in the pharmaceutical industry, both the partners started this venture to challenge the set norms of the industry. This market-leading Third Party Pharma Manufacturing Company was started to make affordable pharma products more accessible in both rural as well as urban areas. We have made significant progress in the same direction by giving PCD Pharma Franchise and providing third-party manufacturing services to other pharma companies. It has strengthened the industry and has expanded the reach of medical products across the country.
