Welcome to PECO PERFUMERS

Our focus on growing with the old and blending with the new has lead us into invention of perfume trends, types and the revival of traditions. It is our core philosophy to learn and create each day for the better. Our knowledge and experience comes to us through our generational perfumers who have helped us evolve into a complete fragrance solution house for all areas of fragrance application. The synergy of our attars and essential oils with new synthetics and organic material from around the world, to create a distinct aroma and identity, is what sets us apart. We are successfully growing and adding to our fragrance house and portfolio to meet the fast-changing customer needs and generational changes in the beauty and fashion segments.
