Welcome to Powell Laboratories (P) Limited

Homeopathy, the gentle healing art, discovered over two centuries ago by Dr. Samuel Hahnemann is now rapidly growing as most popular alternative stream of treatment widely practiced all over the world. It has so blended into the roots and traditions of India that it has been accepted as one of the National Systems of Medicine. Based on some easily comprehensible principles, the strength of Homoeopathy lies in its evident effectiveness, as it takes a holistic as well as individualistic approach of treatment with raising minimum side effects. This immense popularity of Homoeopathy as a safe stream of medicine is growing rapidly and acquiring enormous markets both in India and abroad.
