Welcome to Taj Pharma

Taj Pharmaceuticals has established itself as a top generic pharmaceutical company. With a product range that exceeds 4600 compositions across all therapeutic areas, it has successfully won the heart of consumers across the globe.

The company is acclaimed as one of the top 10 pharmaceutical firms in India and the world's leader in generics. Taj Pharma India is a market leader in therapeutic fields like Critical care, transplantation, virology, and cancer. Taj Pharma's generics and pharmaceuticals businesses work well together, and our knowledge of the bio-similar generic drugs enable us to create individualized therapeutic strategies and integrated healthcare solutions. The range of

healthcare services and products offered by Taj Pharmaceutical includes genetic risk factor screening, disease diagnosis, disease prevention, treatment, and monitoring of the effectiveness of those treatments. Taj Pharmaceuticals has spent the last ten years creating a brand-new category of healthcare organization. Building trust-based, long-lasting partnerships with Taj Pharma stakeholders is a goal shared by the whole Taj Pharma Group. This is clear in several ways. Through the discovery and development of cutting-edge, scientifically sound medications and services that enhance people's health and general well-being worldwide, Taj Pharma scientists are gaining the public's trust. Each day is a brand-new opportunity for Taj Pharma sales representatives, marketing teams, coworkers at Taj Pharma plants, and others throughout the business at all levels of responsibility. TAJ PHARMA GROUP has established Group Companies across India that can more effectively manage its generics manufacturing, with a basket that includes generic medications, health care, and other products. Production and marketing has transformed us to a leading generics pharmaceuticals company that runs its businesses independently due to the wide variety of products.
