Welcome To The Cosmetic

The Cosmetic has embarked on the journey of creating cosmetic products using tried and tested 100% organic ingredients. We began developing herbal cosmetics to have a good sense of feel inside out. We believe that there is much to nature which is still unexplored and thus we want to build exquisite beauty products which are composed of purely herbal ingredients derived from nature and our rich culture.To choose paraben-free products for our valuable customers was the most important decision as they protect our skin from rashes, blisters, burning skin and premature aging. Presence of parabens in the cosmetic products can increase estrogen production, leading to estrogen-positive breast cancer and male infertility issues.
