Welcome To Yarora Lifesciences

Yarora Lifesciences products are first-class dental materials manufactured in Europe. They have been developed to meet the most stringent needs and requirements of the dental profession. Our commitment is to develop high quality and pioneering dental products. Every innovative product YLL creates begins with you. What distinguishes YLL from other dental manufacturers is our commitment to innovation in Dental Material. It's evident in the knowledge we bring to every challenge you face, whether it's improving patient care or making your job easier. When customers talk, we listen. We go forth, and we continue to develop curative products that help define modern dentistry with a focus on composites to bonding, from permanent to temporary cements, from conventional to resin-modified glass ionomer cements, and many more. Our rich portfolio of product lines and programs reflects this ongoing exchange—the inspiration behind decades of standard setting products.
