Welcome To Zenon Healthcare Limited

The word “ZENON” derives from the Greek variant Of “Zenas” (Hospitable) & “Zeno” (Gift of Zeus- Ruler of Heavens). At Zenon Healthcare Limited, it is our mission to enhance the health and well being of families worldwide. We strive to provide healthcare professionals and medical facilities with the medication their patients are in need of at an affordable price. We are an ISO 9001:2008 certified healthcare company and adhere to the World Health Organizations Good Manufacturing Practices (WHO:GMP) norms. Combined with our strong commitment to supply high quality products and our dedication to research and develop new products that will greatly improve the health and wellness, Zenon has created a reputation as being forward-

thinking and an innovative pharmaceutical company.

As a leading player in the Indian pharmaceutical industry, we aim to establish our presence worldwide and ensure that our credibility remains intact all times. Integrity, respect, collaboration, excellence, leadership, and innovation are the core values that embody how Zenon operates. They are the roots to our promise to patients, business partners and community, and of unceasing dedication to make a measurable difference. Not only do we provide the medical products to patients and healthcare facilities, we create a strong bond with all our stakeholders building their trust in our company's operations and products. Zenon encourages diversity among our clients and employees, developing a culture that everyone feels welcomed to be a part of.

Today, Zenon Healthcare is spearheading the development, production and marketing of a broad range of specialty medicines and active pharmaceutical ingredients, OTC products and new therapeutic processes. Our portfolio of pharmaceutical products is comprehensive and strong, extending to all major therapeutic areas and dosage forms. We provide remarkable quality with a strong portfolio of pharmaceutical products available in all areas; including pediatrics, diabetes, allergies, cardiac, ENT, dental and neuro, to name a few. We are fully committed to focus on the

needs of our customers by a strategy that allows us to develop, produce and market high quality medications. We have made it our responsibility to provide innovative products that will enrich the lives of patients and help create a long-term disease management system. We are constantly looking at advancements that will provide our customers with the medication and therapeutic services they need. Because of our dedication to research and test ground breaking pharmaceutical products, Zenon is constantly in search of ways we can expand our company and become among the top healthcare companies in the world.
